Building Emergency Action Plan

This model Building Emergency Action Plan (BEAP) is for the use by departments that are the sole occupant(s) of a building. This model BEAP is to be completed and submitted to the UK Emergency Management Office for review and acceptance. If you need any assistance in the completion of this model BEAP please contact Christy Giles, Director of Emergency Management at 257-3815 or via email at cgile0@email.uky.edu.

1.0 INTRODUCTION

1.1 Each department at the University must have a Building Emergency Action Plan (BEAP) to provide for students, faculty, staff and visitors during an emergency. Each BEAP is developed by the individual department or group of departments occupying the building. The ASTeCC Building’s plan was developed using a model plan prepared by the UK Emergency Management Office. This plan has been reviewed and approved by the Emergency Management Office and implemented on August 31, 2009.

1.2 Each Building Emergency Action Plan is developed not only to provide for the safety of the University community, but also to comply with Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1910.38. The Advanced Science and Technology Commercialization Center BEAP is located behind the entrance door of each classroom, meeting room and office and is accessible on the ASTeCC web site and on file at the UK Emergency Management Office.

1.3 Each employee covered by this Building Emergency Action Plan must be provided with a copy of the plan and instructed as to their responsibilities and actions during an emergency. A record must be maintained including the names of everyone that has been trained. This record is located in the Building Emergency Coordinator’s Office, room A152, ASTeCC. All ASTeCC clients, faculty and staff will be required to sign a written document stating they have read the BEAP.

1.4 The Building Emergency Action Plan will be reviewed annually in January and tested a minimum of one time per spring and fall semester.

_______________________________________

Safety Committee Chair

[Signature]
Reviewed UK Emergency Management Director
2.0 EMERGENCY ACTION RESPONSIBILITIES

2.1 The Department Head or his/her designee is responsible to ensure that the department uses the model Building Emergency Action Plan and develops a department specific plan.

2.2 The Building Emergency Coordinator (BEC) shall be assigned by the Department Head and is responsible for plan maintenance, employee education and annual testing of this plan. Testing will entail conducting an emergency exercise for one chosen section of the plan. During an emergency, the BEC will implement the Building Emergency Action Plan and coordinate emergency actions to ensure the safety of the people in this building. The BEC emergency duties include:

- Ensure that the notification to emergency agencies takes place.
- Assist in building evacuation.
- Report to the assembly area.
- Account for evacuated personnel.
- Collect essential information for emergency personnel (i.e., location of the incident, persons still in building, special hazards in the building, unique conditions).
- Develop specific procedures to assist persons with physical disabilities that are assigned to the department.
- Assist physically disabled employees, students or visitors.
- Implement the post emergency procedures.

2.3 An Assistant Building Emergency Coordinator (ABEC) will be designated to assist the BEC and be responsible for the BEC’s duties in their absence.

2.4.1 Each floor shall designate a Floor Leader (FL) responsible for coordinating the BEAP for that respective floor. The emergency duties, as personal safety and time permits, of the FL include:

- Ensure all persons are evacuated.
- Solicit volunteers to assist individuals with disabilities.
- Conduct a sweep of the floor and ensure that all doors are closed, elevators empty and critical operations stabilized.
- Assist physically disabled employees, students or visitors.

2.4.1.2 An Assistant Floor Leader (AFL) will be designated to assist the FL and be responsible for the FL’s duties in their absence.

4.0 EMERGENCY ACTION PLAN – FIRE

4.1 This section of the Building Emergency Action Plan will be activated in the event of:
   - Fire alarm activation
   - Fire discovered by building occupant

4.2 Any faculty, staff, student or visitor that becomes aware of a fire shall immediately activate the building fire alarm system. The fire alarm system will in turn notify all building occupants that a fire emergency exists. This is accomplished through sounding an audible alarm and a visual flashing light. The University Evacuation Policy mandates that the building shall immediately be evacuated. All faculty, staff, students, and visitors will regard any activation of a fire alarm as a true fire emergency unless there has been previous notification of the fire alarm system being tested.

4.3 The person activating the fire alarm shall dial 911 from a campus phone or #UKPD (#8573) from a cellular phone and advise the UK Police Dispatcher of the fire situation in the building.

4.4 All occupants will immediately evacuate the building utilizing the posted evacuation routes. Occupants may collect their valuables (purse, coat, etc.) if time permits and should close the door upon leaving. Any occupant who comes into contact with a student or visitor should direct them to evacuate the building. Any occupant that comes into contact with a physically disabled individual should assist that individual from the building or to the nearest stairwell landing and seek assistance from an emergency responder outside the building. DO NOT USE ELEVATORS.

4.4.1 Building occupants should make no attempts to extinguish the fire.

4.5 Once out of the building, all occupants should gather at the following locations (see table below) to be accounted. The Building Emergency Coordinator or Floor Leader will conduct a roll call of employees to determine if everyone has vacated the building. No employee should leave the assembly area, either to re-enter the building or leave the campus, until advised to do so by the Building Emergency Coordinator.

| Occupants located in the South wing of ASTeCC should egress to Funkhouser Dr. |
| Occupants located in the North wing of ASTeCC should egress to the Civil Engineering courtyard |
| Do NOT convene in the tunnel type entrance on the North side of the ASTeCC Building |

4.6 The Building Emergency Coordinator will provide information to the UK Police Dispatcher, UK Fire Marshal, Lexington Fire Department or any other emergency response agencies on the scene. This information may include, but is not limited to:
   - Location of the fire.
   - Name and Location of disabled individuals requiring evacuation assistance.
   - Status of the evacuation, personnel missing that may still be in the building.
   - Special hazards associated with the building.

4.7 DO NOT RE-ENTER THE BUILDING UNTIL FIRE OFFICIALS GIVE THE APPROVAL.

5.0 EMERGENCY ACTION PLAN - SEVERE WEATHER
5.1 This section of the BEAP will be activated in the event of a severe weather situation.

5.2 The ASTeCC Managers office has a weather radio in ASTeCC A152. This radio is dual powered working on both batteries and/or the building’s electrical service. This radio will be activated by the National Weather Service to announce any watches or warnings. The ASTeCC Manager’s Office will monitor this radio for any emergency announcements and notify the occupants of ASTeCC of any warnings. Additionally, any employee that becomes aware of a severe weather warning will immediately notify the Building Emergency Coordinator. The Building Emergency Coordinator will immediately notify employees by public address announcement. This notification will advise building occupants of the type of warning (thunderstorm or tornado) and to implement the Emergency Action Plan - Severe Weather.

5.3 Once occupants have been notified of a THUNDERSTORM WARNING, they should take no other steps than to ensure that they are prepared if conditions deteriorate.

5.4 Once occupants have been notified of a TORNADO WARNING, they should gather their valuables and take cover in the nearest Severe Weather Shelter area in the building. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a physically disabled individual should assist that individual to the Severe Weather Shelter areas. Office doors should be closed upon exiting. Building occupants should take cover in the areas outlined in Appendix B.

5.5 The Building Emergency Coordinator and/or Floor Leaders will conduct roll calls to ensure that all employees are in the shelter areas. If an employee is missing, the Building Emergency Coordinator will make a determination whether it is safe to search for the missing employee(s) and solicit someone to locate them and direct them to the shelter areas. If a search is necessary, the use of walkie-talkies, located in the shelter area, will be required to maintain communication.

5.6 If injuries or building damage occurs, notify the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

5.7 Once the warning has expired, the Building Emergency Coordinator will give the word for employees to return to their workstations or go home.

6.0 EMERGENCY ACTION PLAN – EARTHQUAKE

6.1 This section of the BEAP will be activated when a sustained earthquake occurs.

6.2 Earthquakes occur without warning. Some earthquakes are instantaneous tremors and others are significant sustained events followed by aftershocks. Once a significant earthquake begins building occupants must take immediate action. Individuals should take emergency action immediately and additional actions will be implemented after the quake stops.

6.3 An earthquake may cause noticeable shaking of the ground and building. This shaking will vary in intensity (i.e., mild tremors to shaking sufficient to destroy buildings.).

6.4 When a significant earthquake occurs, occupants should immediately take cover. Suggested locations inside buildings that provide cover include:
- Standing in a doorway and bracing your hands and feet against each side.
- Getting under a desk or heavy table.
- Standing flat against an interior wall.
NOTE: Do not seek cover under tables or shelves with chemicals (i.e. cleaning supplies) that could spill and harm personnel.

6.5 Once the shaking has stopped, gather valuables and quickly leave the building. **DO NOT USE ELEVATORS AND AVOID BRIDGE WALKWAY.** All employees should gather at the following locations (see table below) to be accounted. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a physically disabled individual should assist that individual or take them to the nearest stairwell landing and seek assistance from an emergency responder outside the building. The Floor Leaders and/or Building Emergency Coordinator will conduct roll calls to ensure all employees are out of the building.

| Occupants located in the South wing of ASTeCC should egress to Funkhouser Dr. |
| Occupants located in the North wing of ASTeCC should egress to the Civil Engineering courtyard. |
| Do NOT convene in the tunnel type entrance on the North side of the ASTeCC Building. |

6.6 Be prepared for aftershocks. Although smaller than the main shock, aftershocks cause additional damage and may bring weakened structures down. Aftershocks can occur in the first hours, days, weeks, or even months after the quake. Follow the same procedures as for earthquakes.

6.7 If building occupants cannot be accounted for, the Building Emergency Coordinator may direct personnel to search for the missing people but instruct personnel NOT TO RE-ENTER THE BUILDING. The Building Emergency Coordinator should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616 for assistance.

6.8 The Physical Plant Division, UK Fire Marshal, Emergency Management Director and Department Chairperson will consult and make a decision on whether employees can return to their workstations or be dismissed for the day. The Building Emergency Coordinator will give direction to employees based on that decision.

7.0 **EMERGENCY ACTION PLAN - HAZARDOUS MATERIALS**

7.1 This section of the BEAP should be activated in the event of a hazardous material incident outside that could have an impact on this building.

7.2 Hazardous material accidents can occur inside this building, on campus or in the adjacent areas (railway) and could impact this building (i.e. gas leak). Local media will broadcast warnings over radio and television to communicate that a hazardous materials incident has occurred. The National Weather Service will broadcast similar warnings over NOAA Weather Radios. Community sirens might sound, notifying people within hearing range to listen to the media. Information Technology may broadcast information over the University’s Intranet. Once building occupants become aware of a hazardous material incident that may impact the building, they should notify the Building Emergency Coordinator. The Building Emergency Coordinator will immediately notify employees by public address announcement. This notification will advise building occupants to implement the emergency action plan.

7.3 The local community uses two strategies for protecting citizens during hazardous material emergencies, the Building Emergency Coordinator will notify the building occupants of which strategy has been implemented.
7.4.1 The first strategy that local government could use is "Shelter in Place". Everyone in the building would be required to stay in the building until the all clear is given. Employees will take the following actions:

- Close all windows and doors
- Turn heating/cooling systems (HVAC) off
- Move to the designated shelter in place location
- Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions
- Any occupant that comes into contact with a physically disabled individual should assist that individual

7.4.2 The Building Emergency Coordinator will ensure that the actions outlined in section 7.4.1 are completed. The Building Emergency Coordinator and/or Floor Leaders will also conduct a roll call to ensure that all personnel are accounted for.

7.4.3 The Building Emergency Coordinator will monitor the news media or the NOAA Weather Radio for further updates and will advise personnel on any changes in the situation. The Building Emergency Coordinator will also announce the all clear when declared by community officials release, the Building Emergency Coordinator or designee should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616. UK Police will dispatch emergency personnel to assist.

7.4.5 The Building Emergency Coordinator will direct personnel to open doors and windows and allow the building to air out after the all clear is given. The UK Physical Plant Division will reactivate the heating/cooling system (HVAC).

7.5.1 The second strategy that local government could use is "Evacuation". The Building Emergency Coordinator will direct personnel to take appropriate action. This action may include:

- Walk to the designated assembly area to be evacuated
- Walk or drive away from the area using travel directions determined by community officials
- Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions
- Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals

7.5.2 The Building Emergency Coordinator will ensure that the actions outlined in section 7.5.1 are completed as directed by community officials. The Building Emergency Coordinator and/or Floor Leaders will also conduct a roll call to ensure that all personnel have evacuated the building.

7.5.3 If personnel become ill from the chemical release, the Building Emergency Coordinator or designee should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

7.6 If building occupants cannot be accounted for, the Building Emergency Coordinator should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

7.7 The Building Emergency Coordinator will determine whether employees should return to their workstations or go home after consultation with the UK Fire Marshal, UK Police Department, Emergency Management Director and Vice President of Commercialization and Economic Development Office Representative.
8.0 EMERGENCY ACTION PLAN - CHEMICAL EMERGENCY

8.1 This section of the BEAP should be activated in the event a hazardous material incident occurs inside of the building and/or hazardous incident from surrounding buildings (laboratory, maintenance or physical plant operation).

8.2 Any person that becomes aware of a serious chemical accident in the building will immediately notify the co-workers around them and their supervisor. Either the person who discovered the chemical accident or the supervisor will immediately notify the BEC. The Building Emergency Coordinator will immediately notify employees by public address announcement. This notification will advise building occupants to implement the BEAP for Chemical emergencies.

8.3.1 Personnel that are involved with a laboratory experiment or process should take steps to stop the process or experiment to prevent additional accidents if it is left unattended.

8.3.2 Personnel in the immediate area of the chemical accident will vacate the area and report to the following locations (see table below) to be accounted. They should leave the area immediately, closing, but not locking, any doors as they leave. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

| Occupants located in the South wing of ASTeCC should egress to Funkhouser Dr. |
| Occupants located in the North wing of ASTeCC should egress to the Civil Engineering courtyard. |
| Do NOT convene in the tunnel type entrance on the North side of the ASTeCC Building. |

8.4 The Building Emergency Coordinator will immediately notify the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616 and report the chemical emergency. The Building Emergency Coordinator will also ensure that the HVAC for the building is shut down (this may require a call to the Physical Plant Delta Room at 257-2830), to prevent the spread of chemical gases through the cooling/heating system.

8.5 If personnel become ill from the chemical release, the Building Emergency Coordinator or designee should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

8.6 The Building Emergency Coordinator will determine if further evacuations are necessary.

8.7 The Building Emergency Coordinator and/or Floor Leaders will conduct a roll call to ensure that all personnel have evacuated the building.

8.8 The Building Emergency Coordinator will provide information to the UK Police, Environmental Health & Safety Officer, Lexington Fire Department or any other emergency response agencies on the scene. This information may include, but is not limited to:

- Location of the spill,
- Status of the evacuation, personnel missing that may still be in the building, and
- Special hazards associated with the building.

9.0 EMERGENCY ACTION PLAN - UTILITY OUTAGE
9.1 This section of the BEAP should be activated in the event of a utility outage.
9.2 Employees will become aware of utility outages by the obvious absence of that particular utility:
- No Lights, Computers not working - Electric
- Toilets won't flush, drinking fountains not working - Water
- Inability to place outgoing telephone calls - Telephone
- Building won't warm up during winter - Steam or Gas
- Building won't cool in summer - Electric or chilled water

9.3 The Building Emergency Coordinator, Vice President of Commercialization and Economic Development Office Representative or other administrative staff should contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) on a cellular phone or 257-1616 to report the problem and obtain any available information.

9.4 While a power interruption does not usually cause emergencies within a facility or injuries to its employees, hazards may be created by outages. The Building Emergency Coordinator in conjunction with the Vice President of Commercialization and Economic Development Officeperson will determine the appropriate course of action. The Building Emergency Coordinator and Vice President of Commercialization and Economic Development Office Representative should consider the following issues:
- Dangers from tripping and injuries due to lights being out.
- Person(s) being trapped on elevators.
- Dangers of extreme heat and cold on employees.
- Inability to contact responders if an emergency occurs while telephones are out.
- Sanitation problems due to no water

9.5 Unless a decision has been made by University officials, the Building Emergency Coordinator and Vice President of Commercialization and Economic Development Office Representative will make a decision regarding the continuance of work in the building during a utility interruption. Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

9.6 If anyone is trapped on an elevator, immediately call the Physical Plant Division at 257-3844 for assistance.

10.0 EMERGENCY ACTION PLAN - WORKPLACE VIOLENCE, TERRORISM

10.1 This section of the BEAP should be activated in the event any type of workplace violence or act of terrorism.
10.2 Building occupants will become aware of a violent act by the sounds of an explosion, gunfire, scuffling, or by observation of events that could only be intentional acts of violence. The person(s) who observe these life-threatening acts should immediately seek shelter and call the UK Police Department at 911 from a campus phone, #UKPD (#8573) on a cellular phone or 257-1616.

10.3 The Building Emergency Coordinator should attempt to communicate to everyone in the building that a perpetrator of workplace violence is in the building. This may be done by telephone and/or word of mouth.

10.4 Different types of workplace violence require different actions:
10.4.1 Explosion - If an explosion occurs, building occupants should leave the building using the same evacuation plan and procedures as they would for a fire.

10.4.2 Gunfire - If you become aware of gunfire occurring in the building, take refuge in a room that can be locked. The room should also provide limited visibility to anyone that is outside of it. Secure the door and hide under a desk, in a closet or in the corner. **DO NOT UNLOCK THE DOOR FOR ANYONE.** Once the situation has been resolved, a UK Police Officer or other University official will unlock the door and provide you with instructions.

10.4.3 Physical Threat - If someone's actions pose a physical threat to you, evacuate the area and report the situation to a supervisor. UK Police may be contacted by dialing 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

10.4.5 Toxic or Irritant Gas - Immediately evacuate the building using the same evacuation plan and procedures as they would for a fire.

10.4.6 Hostage Situation - Immediately vacate the area or seek safe, secure shelter, take no chances to endanger the life of the hostage. Contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) on a cellular phone or 257-1616. In the event someone is hurt and/or a fire is caused by these events, advise the UK Police Department of this situation.

10.5 Any occupant who comes into contact with a student or visitor should direct them to take appropriate actions. Any occupant that comes into contact with a visitor or student that is physically disabled should assist those individuals.

10.6 The Building Emergency Coordinator and UK Police Department will coordinate the building’s security once the Incident Commander releases the building. This group will also contact building occupants and advise them on when to return to work.

10.7 The Building Emergency Coordinator and/or the Vice President of Commercialization and Economic Development Office will participate in any post-incident critique regarding the emergency.

11.0 **EMERGENCY ACTION PLAN - BOMB THREAT/EXPLOSION/SUSPICIOUS PACKAGE**

11.1 This section of the BEAP should be activated in the event of a Bomb Threat/Explosion or discovery of a suspicious package.

11.2 A person would become aware of a bomb threat by either a telephone call, e-mail or a letter. The person receiving the threat shall immediately notify the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616.

11.2.1 If the threat is made by telephone, ascertain as much information as possible about the bomb and its location, such as:
- Exact location of the bomb?
- When is the bomb going to explode?
- What kind of bomb is it?
- Why was it placed?
- Who is speaking?
(See Appendix D for Bomb Threat Caller Checklist)
11.3 The person should then notify his or her supervisor, the Building Emergency Coordinator and the Vice President of Commercialization and Economic Development Office Representative as quickly as possible.

11.4 A decision will be made by the Building Emergency Coordinator, Vice President of Commercialization and Economic Development Office Representative and UK Police Department to determine if a building evacuation is warranted. An intercom announcement will be made to evacuate. If it is warranted, evacuation should take place using the same evacuation plan and procedures as they would for a fire.

11.5 Occupants should not touch any suspicious or unfamiliar objects. Occupants should wait for police personnel to arrive on the scene before conducting any type of search.

11.6 The Building Emergency Coordinator, Vice President of Commercialization and Economic Development Office, and UK Police Department will coordinate the building’s security once the Incident Commander releases the building. This group will also contact building occupants and advise them on when to return to work.

11.7 The Building Emergency Coordinator and/or the Vice President of Commercialization and Economic Development Office will participate in any post-incident critique regarding the emergency.

11.8 If an explosion does occur, building occupants should leave the building using the same evacuation plan and procedures as they would for a fire.

12.0 EMERGENCY ACTION PLAN - MEDICAL EMERGENCY

12.1 Implement the BEAP for Medical Emergencies for any injury or illness that requires more than simple first aid.

12.2 Immediately contact the UK Police Department at 911 from a campus phone, #UKPD (#8573) from a cellular phone or 257-1616 and report the emergency. Automated External Defibrillator’s are located in A152 and A144 of ASTeCC. Please contact Tanya Floyd at 218-6563 or Tom Goodness at 218-6554.

12.3 When reporting the emergency, provide the following information:
- Type of emergency
- Location of the victim
- Condition of the victim
- Any dangerous conditions
- If you call 911 from a cell phone, you will need to report the street address: 145 Graham Avenue

12.4 Comfort but do not move the victim.

12.5 Have someone standby outside the building to “flag down" EMS when they reach the vicinity of the building.

12.6 Once the victim has been cared for and is transported, normal worker injury reporting procedures should be followed.

13.0 ACTIONS TO TAKE AFTER THE EMERGENCY
13.1 Once the emergency is over and the building has been returned to the occupant, the Building Emergency Coordinator and Vice President of Commercialization and Economic Development Office will determine if the building occupants should return to work or be released. If they are released, employees will be advised when to return to work.

13.2 The Building Emergency Coordinator, Vice President of Commercialization and Economic Development Office, and UK Police Department will coordinate the building’s security once the Incident Commander releases the building. This group will also contact building occupants and advise them on when to return to work. Environmental Health and Safety will coordinate the mitigation of the spill and notification to governmental agencies.

13.3 The Building Emergency Coordinator and/or the Department Chair will participate in any post-incident critique regarding the emergency.

13.4 The Building Emergency Coordinator will contact the University’s Risk Management Office at 257-6214 regarding any property damage caused by the incident. The Building Emergency Coordinator will also contact Physical Plant Delta Room at 257-2830 regarding any repairs needed from damage caused by the incident. In the event an employee is injured, normal worker injury reporting procedures should be followed.

13.5 The Department Chair will direct that a report be prepared after implementing this plan. This report shall review emergency actions, their effectiveness and needed revisions. This report will be shared with employees and forwarded to the UK Office of Emergency Management, 520 Oldham Ct., Lexington, Kentucky 40502. Updates and plan changes will be made as needed and building occupants will be provided with a revised plan.
Advanced Science and Technology Commercialization Center (1st Floor)

Evacuation Routes

The evacuation routes illustrate the exits for evacuation of this building and lists emergency procedures that have proven to be beneficial for personal safety during a fire emergency. All occupants should become familiar with the routes and emergency procedures.

PERSON DISCOVERING FIRE SHALL

R- rescue, if possible without endangering yourself, anyone in immediate danger:
NEVER enter an unknown area, especially if smoke is visible,
A- activate the fire alarm system: DIAL 911 as soon as possible and report the incident,
C- confine the fire by closing doors as you leave the building,
E- evacuate the building and report the situation to the first arriving firemen or police.
NOTE: you are not required to Extinguish a fire with a fire extinguisher and should use an extinguisher only if you have been trained and the situation does not present a personal safety hazard.

For Any Emergency-Dial 911

WHEN THE FIRE ALARM SOUNDS

- FEEL THE DOOR. A "too hot to touch door" means the fire is outside the door.
- IMMEDIATELY EVACUATE the building. Treat all alarms as a real emergency. Always use the exit stairs. Never use an elevator. Close the door as you leave the room.
- CRAWL should you get caught in smoke. If necessary, go to the window and signal for help.
- ASSIST A PHYSICALLY IMPAIRED PERSON to the closest exit stairwell and advise emergency personnel of this condition.
- NEVER RE-ENTER THE BUILDING until fire officials give the approval.
- REPORT anyone causing a false alarm to the emergency responding personnel.
Evacuation Routes

This evacuation route illustrates the exits for evacuation of this building and lists emergency procedures that have proven effective for personal safety during a fire emergency. All occupants should become familiar with the routes and emergency procedures.

PERSON DISCOVERING FIRE SHALL:

- Rinse, if possible without endangering yourself, anyone in immediate danger.
- NEVER enter the fire alarm system; DIAL 911.
- Activate the fire alarm system: DIAL 911.
- Confirm the alarm system is active and report the incident.
- Assess a physically impaired person to the closest safe and visible route.
- Never re-enter the building until fire officials are in control.
- Report anyone causing a false alarm to the emergency personnel of this condition.

Evacuation Routes

The evacuation routes illustrate the exits for evacuation of this building and lists emergency procedures that have proven to be beneficial for personal safety during a fire emergency. All occupants should become familiar with the routes and emergency procedures.

PERSON DISCOVERING FIRE SHALL

R: rescue, if possible without endangering yourself; anyone in immediate danger: NEVER enter an unknown area, especially if smoke is visible,
A: activate the fire alarm system: DIAL 911 as soon as possible and report the incident,
C: confine the fire by closing doors as you leave the building,
E: evacuate the building and report the situation to the first arriving firemen or police. NOTE: you are not required to Extinguish a fire with a fire extinguisher and should use an extinguisher only if you have been trained and the situation does not present a personal safety hazard.

Procedures for Providing Assistance to Mobility Impaired Individuals

University of Kentucky Emergency Assistance Card Program

At some point in time almost everyone needs assistance in some way. Not everyone with a disability will require assistance during an emergency. Evaluate your situation and determine your own needs. It is the responsibility of each person to ask for help when needed.

Evacuation for persons with disabilities -- Appropriate evacuation procedures should be prearranged between the persons with disabilities and the people assigned to assist them. The University has developed an Emergency Assistance Card program that is available upon request. This card can be carried by individuals with disabilities and presented to a co-worker, friend or faculty, who in turn will give it to the emergency team on site. For more information about the card or to receive a card, contact the University Equal Opportunity Office or UK Disability Resource Center.

![Emergency Assistance Card](image)

(front side of card)

As a result of a disability, I am unable to evacuate the building and will require your assistance during this emergency. I have given this card to the person presenting it to you.

- [ ] Wheelchair User
- [ ] Oxygen User
- [ ] Other

Name: ____________________________

Location: ____________________________

Assistance Required: ____________________________

(back side of card)

Individuals with unobservable disabilities or impairments may or may not self-identify before an emergency. Such conditions may include arthritis, a cardiac condition, chronic back problems, asthma, a learning disability, etc. These persons may need additional help during emergency situations. Request that all persons who feel they may need special assistance notify appropriate key departmental persons so that arrangements can be made in advance to meet their needs.
GENERAL GUIDELINES

- It is University Policy that all occupants must evacuate the building when the fire alarm is activated. The only exceptions to the Policy are patient related areas such as the Hospital where special procedures have been developed.
- All exit stairwells are fire rated and are protected by self-closing/self-latching doors. These are the safest areas during an emergency. Physically impaired persons are advised to proceed to them immediately.
  - Corridors leading to the exit stairwells must be maintained clear and unobstructed at all times.
  - If there is no imminent danger and there are no special problems evacuating the person, place the individual into or next to the stairwell. Rescue personnel are instructed to check all exit corridors and exit stairwells first for any stranded persons.
  - No one should attempt to use an elevator to evacuate during an emergency. Use the stairs instead.

SPECIFIC RECOMMENDATIONS

- Visually Impaired Persons
  - Tell the person the nature of the emergency and offer your arm for guidance. This is the preferred method when acting as a "sighted guide."
  - As you walk, tell the person where you are and where obstacles are located.
  - When you reach safety, orient the person to the location and ask if further assistance is needed.

- Hearing Impaired Persons
  - Some campus buildings are equipped with audible fire alarms which should be activated during an emergency. However, hearing impaired individuals may not receive the audible signal. Use an alternative warning system. Several methods can be used, including:
    - Write a note to tell the person of the situation, the nearest evacuation route, and where to meet outside. (Sample script: "FIRE! Go out the rear door on your right. NOW. Meet outside on the front lawn.")
    - Turn the light switch on and off to gain their attention and then indicate through gestures or in writing what is happening and what to do. Do not use the light switch technique if you smell natural gas in the area.

- Persons Using Crutches, Canes, or Walkers
  - In evacuations, these individuals should be treated as if they were injured. Carrying options include using a two-person, lock-arm position or having the individual sit on a sturdy chair (preferably with arms) which is then lifted and carried.

- People Who Use Wheelchairs (Non-ambulatory)
  - Most non-ambulatory persons will be able to exit safely without assistance if they are on the ground floor.
  - If you are assisting a non-ambulatory person, be aware that some people have minimal ability to move and lifting them may be dangerous to their well-being. Some individuals have very little upper trunk and neck strength.
  - Frequently, non-ambulatory persons have respiratory complications. Remove them from smoke and vapors immediately. Some people who use wheelchairs may have electrical
respirators. Give them priority assistance, as their ability to breathe may be seriously in
danger.

The needs and preferences of non-ambulatory individuals vary. Always consult with the person
as to his or her preference regarding:

- Ways of being moved.
- The number of people necessary for assistance. If carrying a person more than three flights,
a relay team will be needed.
- Whether to extend or move extremities when lifting because of pain, braces, etc.
- Whether a seat cushion or pad should be brought along.
- Being carried forward or backward on stairs.
- Aftercare, if removed from the wheelchair.
- Remember to check the intended route for obstructions before transporting the individual.
  Delegate others to bring the wheelchair. When the wheelchair is left behind, remove it from
  the stairwell and place it so it does not obstruct the egress of others. Reunite the person
  with their wheelchair as soon as it is safe to do so.

Wheelchairs have many movable or weak parts which were not constructed to withstand the
stress of lifting (i.e., the seat bar, foot plates, wheels, movable arm rests, etc.). If the chair is
battery-powered, remove the batteries before moving it. Make sure the foot rests are locked and
the motor is off. If a seatbelt is available, secure the person in the chair.

For more information about this program or to obtain a card, please contact Jake Karnes,
Disability Resource Center, at 257-2754; Patty Bender, Office of Institutional Equity, at 257-
8927; or Christy Giles, Office of Emergency Management, at 257-3815.

Bomb Threat Caller Checklist

Telephone Procedures

INSTRUCTIONS: Be calm, be courteous, listen. Do not interrupt the initial message of the caller. If possible, notify your supervisor immediately by a pre-arranged signal while the caller is on the line.

Name of Operator_____________________________ Time__________ Date____________

Caller’s Identity:

Sex: Male____ Female____ Adult____ Juvenile____ Approximate age_________ in years
Origin of Call: (Check Caller ID)
Local____ Long Distance____ Booth____ Internal____
Write the number here_________________________

Voice Characteristics Speech Language

____Loud _____Soft _____Fast ____Slow _____Excellent ____Good ____High Pitch _____Deep
____Distinct ____Distorted ____Fair ____Poor ____Raspy ____Pleasant ____Stutter ____Nasal
____Foul ____Intoxicated ____Slurred ____Lisp ____Other

Accent Manner Background Noises

____Local _____Not Local _____Calm _____Angry _____Mixed _____Airplanes _____Foreign _____Region
____Rational ____Irrational ____Bedlam ____Animals ____Race ____Other ____Coherent
____Incoherent ____Trains ____Voices ____Deliberate ____Emotional ____Music _____Quiet
____Righteous ____Laughing ____Factory Machines ____Street Traffic ____Party Atmosphere
____Office Machines

BOMB FACTS

Pretend difficulty with hearing. Keep the caller talking. If the caller seems agreeable to further conversation, ask questions like:

When will it go off? Certain hour_____________ Time remaining_____________
Where is it located? Building_______________ Floor/Office/Area______________
What kind of bomb?__________________________
How do you know so much about the bomb?____________________________________
Where are you now?__________________________
What is your name and address?________________________________________________

If the building is occupied, inform the caller that detonation could cause injury or death.

Write out the message in its entirety and any other comments on a separate sheet of paper and attach to this checklist.

Did the caller appear familiar with the building by his description of the bomb location?________

ACTIONS TO TAKE IMMEDIATELY AFTER THE CALL

☐ NOTIFY THE UNIVERSITY POLICE, EXT 911 or 257-1616
☐ NOTIFY YOUR IMMEDIATE SUPERVISOR.
Talk to no one -- other than instructed by your supervisor or the Police.
