How to Gain Access to DLAR Animal Facilities

1. Complete the Request for Access to DLAR Facilities.

2. If your animals are housed in the Biomedical Biological Sciences Research Building (BBSRB), complete the Request for Personal Access Code BBSRB, in addition to the Request for Access to DLAR Facilities.

3. If your animals are in the Multi–Disciplinary Science Building, complete the Request for Personal Access Code MDSB.

4. You will not be granted access to animal facilities until you have completed all training required by the IACUC and have been added to an active protocol. Once your name appears on an active protocol, DLAR personnel will contact you to request that you go to 204 HSRB to receive the DLAR sticker on your ID badge.

5. DLAR personnel will then contact UKPD to add access to your badge.

General Information

✓ You are required to wear your badge in plain sight while in animal facilities.

✓ Do not loan your badge to anyone, or borrow anyone else’s badge. If you do so, your access to DLAR animal facilities will be revoked and your badge may be confiscated.

✓ If you have had access to animal facilities and your badge stops working, email the description of the problem (including the room number and building name) with your name and UK ID# to CampusAccess@uky.edu.
