How to Gain Access to DLAR Animal Facilities

1. Be sure you have completed all IACUC mandatory training, have been added to an active animal use protocol by your Principal Investigator (PI), and have an active UK ID badge.

2. Complete the Request for Access to DLAR Facilities and submit it to DLAR using one of the methods listed on the form. If your animals are housed in the Biomedical Biological Sciences Research Building (BBSRB), complete the Request for Personal Access Code BBSRB as well.

3. DLAR personnel will verify that the IACUC has approved you on an active protocol, and then will contact you regarding DLAR access.

4. Come to the DLAR Office in 204 HSRB. You must bring your ID badge with you. DLAR personnel will verify the access levels you need, and add access to your badge.

General Information

✓ You are required to wear your ID badge in plain sight at all times while in animal facilities.

✓ Do not loan your ID badge to anyone, or borrow anyone else’s badge. If you do so, your access to DLAR animal facilities will be revoked and your ID badge may be confiscated.

✓ If you have had access to animal facilities and your badge stops working, email a description of the problem (including the room number and building name where the problem occurred) with your name and UK person ID# to CampusAccess@uky.edu.
