Introduction:

The Graduate School is pleased to present the annual Doctoral Placement Survey Report. This report is compiled based on a survey conducted by the Graduate School for doctoral recipients from the 2002-2003 academic year (i.e., doctoral degrees awarded in August, 2002; December, 2002; and May, 2003). The survey is distributed to Directors of Graduate Studies and major professors late in the fall semester of the academic year following graduation (Fall 2003 for this report), and the responses are collected from the programs during the subsequent spring term. The DGS and major professor are asked to identify the nature and location of each doctoral recipient's *first* position of employment upon graduation. Placement categories include Academic (Administration, Research, College and University Teaching), Post-Doctoral, Business and Industry, Government, or other.

The Doctoral Placement Survey Report is divided into two sections. The first section contains a disciplinary profile of our doctoral graduates as well as tables and figures that summarize doctoral placement for all graduates, including specific tables

for Kentucky residents and international degree recipients. The second section provides a comprehensive listing detailing the job placement of all doctoral degree recipients arranged by the nature of the job placement and graduate program.

As you review this report, I am sure that you will be impressed by the broad range of employment secured by our doctoral graduates and the impact that they are making and will continue to make throughout the academic community, business and industry, and government. I encourage you to share this report with your unit faculty and staff, and other interested parties. If you need additional information concerning our doctoral graduates, please contact Christy Jacks, Institutional Assessment Analyst for the Graduate School.

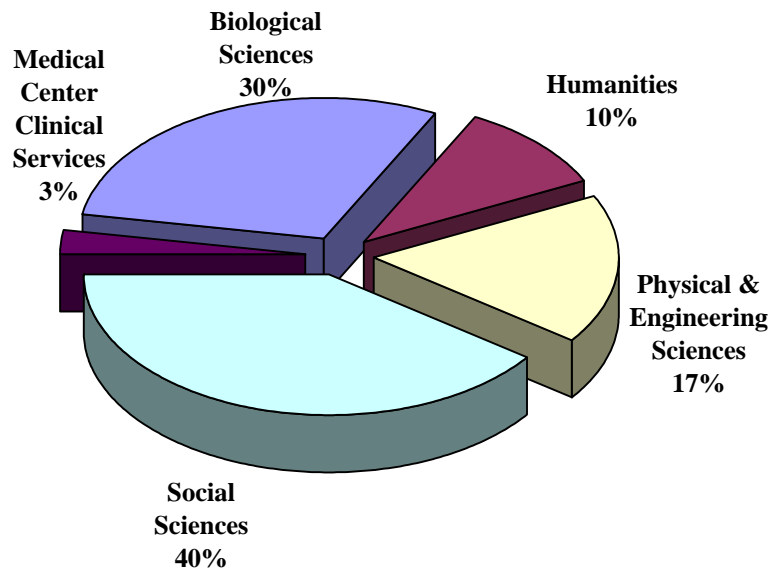

Dr. Jeannine Blackwell, Dean
The Graduate School

August, 2004

Highlights:

- The University of Kentucky produced 208 doctoral graduates during the 2002-2003 academic year. Of these 62 (30%) were in Biological Sciences, 6 (3%) were in the Medical Center Clinical Services, 21 (10%) were in the Humanities, 36 (17%) were in the Physical and Engineering Sciences, and 83 (40%) were in the Social Sciences.
- 50 doctoral recipients (24%) accepted employment in Kentucky, while an additional 109 (52%) obtained employment elsewhere in the United States. 19 doctoral recipients (9%) were employed outside of the U.S.
- 98 of UK's doctorates (47%) from 2002-2003 entered academic-related positions, including teaching, academic administration, and research. An additional 41 doctoral recipients (20%) obtained post-doctoral positions in university and other research settings.
- 22 of UK's doctorates (11%) obtained positions in business and industry, while 10 graduates (5%) entered government or military positions.
- 87 of UK's doctorates (42%) were awarded to women. Of these 32 (37%) accepted College or University teaching positions.
- 87 (9% increase from last year) Kentucky residents received doctoral degrees in 2002-2003. Of these, 38 (44%) accepted positions in the Commonwealth.
- 55 international students received doctorates in 2002-2003.
- 10 minority students received doctorates in 2002-2003.
- The number of doctoral recipients who obtained College or University teaching positions in 2002-2003 was 73, which is lower than the five-year average in this category (*average = 90 graduates*).
- The number of graduates accepting post-doctoral positions (41) was lower than the five-year average in this category (*average = 46 graduates*).
- The number of job placements in business and industry or government positions was 32, which is lower than the five-year average for these categories (*average = 38*).
