

**MEMORANDUM**

**DATE:** May 20, 1998

**TO:** Deans, Chairs, and Directors of Graduate Studies

**FROM:** Michael T. Nietzel, Dean *MTN*

**SUBJECT:** UK DOCTORAL PRODUCTION AND PLACEMENT, 1996-1997

Please find attached summary information on the 240 doctorates who graduated from UK during the 1996-1997 academic year. Despite the tight job market for graduates in some disciplinary areas, UK's doctoral recipients appear to have been competitive for positions. Only 0.4% indicate that they sought but did not find a position.

The majority of our doctoral graduates continue to enter academic positions. Forty-nine percent took positions in K-12, college, university, research, and administrative positions at UK, five regional universities, seven colleges, as well as three community colleges, and five public school systems.

Copies of these materials are currently being disseminated to the Chancellors, Vice Presidents, and other academic officers. The reports attached cover the various types and locations of doctoral placement by generic arrangement and by academic program. Should you have questions about these data, please let us know.
