

INTRODUCTION:

The Graduate School is pleased to present the GRE Report for Fall 2000, 2001, and 2002. The Graduate Record Examination is required of all applicants to the University of Kentucky Graduate School, with the exception of students applying to certain graduate programs in the College of Business and Economics (GMAT required for Accounting and Business Administration programs). Applicants to the programs in Health Administration, Public Administration, and Public Health have the option of presenting either the GRE or the GMAT.

In this report, mean scores are reported for each of the three portions of the GRE: verbal, quantitative, and analytical. The results are reported by College (Fall 2000, Fall 2001, and Fall 2002), as well as by graduate program for all enrolled graduate students. The percentiles reported are based on the ETS percentiles established over the following periods:

Fall 2000 Results: Percentiles based on testing period, October 1999 to September 2000.

Fall 2001 Results: Percentiles based on testing period, October 2000 to September 2001.

Fall 2002 Results: Percentiles based on testing period, October 2001 to September 2002.

Additional information regarding the use and interpretation of GRE scores is available from the Educational Testing Service web site, <http://www.gre.org>.

If you have questions or need additional data for your graduate program or college, I encourage you to contact Marilyn Lyons, Institutional Assessment Analyst in the Graduate School.

Douglass S. Kalika, Acting Dean
The Graduate School
