

Over past several years, the Graduate School has collected citations for refereed publications and presentations and juried projects produced by graduate students. This assessment was related to strategic indicator #6 of the 1998 University Strategic Plan:

Increase by 15% the number of graduate student publications in refereed journals, presentations at professional meetings, and/or earned recognition for juried creative products.

Although a new plan has emerged, the Graduate School has elected to continue to collect this information as one method by which to assess graduate student productivity.

The most recent summary report is available at: [Graduate School Productivity Reports](#).

Citations and a summary table are now requested for **Calendar Year 2006**. Please submit the following information for **Calendar Year 2006**:
