

# Data Science Applications in Healthcare

## DATE

December 17th,  
Tuesday

## LOCATION

TODD 170

## TIME

2:00 - 3:00 PM

### **Dr. Daniel Harris, PhD**

*Institute for Pharmaceutical Outcomes & Policy (IPOP)  
Center for Clinical & Translational Science (CCTS)*

Dr. Harris will be presenting a monthly workshop this winter at the University of Kentucky. The Data Science Applications in Healthcare series meets to discuss current data science trends, technologies, and problem-solving strategies.

This session's topic is "Getting Started with Real-World Data". We will discuss local and national data sources; we will summarize the national open data movement. We will also demonstrate how to get started and load data for platforms such as SQL and R.
