Does my research study need to pause during COVID-19?

- **Does your study involve human subject contact?**
  - Yes:
    - Is your study a treatment intervention trial designed to be of direct benefit to the subject?
      - Yes:
        - Does your trial involve randomization to a placebo?
          - Yes: Pause
          - No: Pause unless stopping supportive care would cause harm to the subject.
      - No: Pause unless stopping the supportive care would cause harm to the subject.
  - No: Do not pause your study.

- **Is your study a non-treatment intervention (studies that include supportive care, prevention, diagnostic, behavioral, etc.)?**
  - Yes: Pause except for remote contact.
  - No: Does the benefit of treatment outweigh the risk of COVID-19 exposure?
    - Yes: Does the benefit to the subject outweigh the risk to the healthcare staff?
      - Yes: Do not pause your study.
      - No: Pause.
    - No: Pause.

- **Does the benefit of treatment outweigh the risk of COVID-19 exposure?**
  - Yes: Pause.
  - No: Pause except for remote contact.

- **Does the benefit to the subject outweigh the risk to the healthcare staff?**
  - Yes: Do not pause your study.
  - No: Pause.
