Registration

Results

Study Status

If you change the recruitment status in study status, also change it in location

If you open any element of your registry, update your verification date

If your study is not longer recruiting, enter the actual number of participants in the study design section and change count type to "actual" from "anticipated"

Study Design

If you change the number of arms/groups, change the number of arms/group in the study design

Contacts/Locations

If the study PI changes, change the study official in the contact section

Arm/interventions or Groups/interventions

If you alter your intervention name, change it in the arms description

Sponsor/Collaborators

Outcome Measures

Copy/paste Arm name and description and intervention name and description into each data element

Copy/paste primary outcome title, description and time frame into each data element

Baseline characteristics

Primary outcome data

Secondary outcome data

Adverse events data
